

Thieme Publishers, IUPAC, and the Editors of *Synthesis*, *Synlett*, *Synfacts*, and *Science of Synthesis* announce the

# 2010 Thieme–IUPAC Prize in Synthetic Organic Chemistry

## Call for Nominations

The Thieme–IUPAC Prize is presented every two years on the occasion of the International Union of Pure and Applied Chemistry – International Conference on Organic Synthesis (IUPAC–ICOS). The 2010 ICOS will be held in Bergen, Norway, on August 1–6. The prize is awarded to a scientist under 40 years of age whose research has had a major impact in synthetic organic chemistry.

### Prize € 5000

The Thieme–IUPAC Prize has been awarded to Stuart L. Schreiber in 1992, Paul Knochel in 1994, Eric N. Jacobsen in 1996, Andrew G. Myers in 1998, Alois Fürstner in 2000, Erick M. Carreira in 2002, John F. Hartwig in 2004, David W.C. MacMillan in 2006, and F. Dean Toste in 2008.

The prize will be awarded on the basis of scientific merit for independent research dealing with synthesis in the broadest context of organic chemistry, including organometallic chemistry, medicinal and biological chemistry, designed molecules, and materials. Candidates must be under 40 years of age as of January 1 of the year in which the prize is awarded.

Proposals must be accompanied by a biographical sketch of the nominee, a list of the candidate's ten most significant publications, and a statement of how the candidate's research has had a major impact on the field of synthetic organic chemistry. The material will be confidentially forwarded to an independent selection committee.
