ANALYTICAL CHEMISTRY DIVISION
COMMISSION ON RADIOCHEMISTRY AND NUCLEAR TECHNIQUES*

INFORMATION ON TRAINING IN
RADIOCHEMISTRY AND NUCLEAR
TECHNIQUES

Prepared for publication by

J.-P. ADLOFF

Laboratoire de Chimie Nucléaire, Centre de Recherches Nucléaires, BP 20,
F-67037 Strasbourg Cédex, France

* Membership of the Commission during the period (1985–89) this report was prepared was as follows:

Chairman: 1985–87 J. C. White (USA); 1987–89 D. C. Hoffman (USA); *Secretary:* 1985–87 D. C. Hoffman (USA); 1987–89 H. R. von Gunten (Switzerland); *Titular Members:* J.-P. Adloff (France; 1987–89); J. Foos (France); K. S. Kasprzak (USA); Y.-F. Liu (China; 1987–89); M. Sakanoue (Japan; 1985–87); I. Zvára (USSR); *Associate Members:* H. J. Ache (FRG); J.-P. Adloff (France; 1985–87); H. A. Das (Netherlands); H. R. von Gunten (Switzerland; 1985–87); R. J. Ch. Hagemann (France; 1987–89); G. Herrman (FRG; 1987–89); P. Karol (USA); Y.-F. Liu (China; 1985–87); S. G. Luxon (UK); W. Maenhaut (Belgium; 1986–89); M. Sakanoue (Japan; 1987–89); H. Sano (Japan; 1987–89); *National Representatives:* G. B. Baro (Argentina); E. Roth (France); K. Burger (Hungary; 1987–89); M. Sankar Das (India; 1987–89); E. Yellin (Israel); T. Shiokawa (Japan; 1986–89); E. Steinnes (Norway); M. Peisach (RSA); N. K. Aras (Turkey; 1987–89); B. F. Myasoedov (USSR); N. E. Holden (USA).

Republication of this report is permitted without the need for formal IUPAC permission on condition that an acknowledgement, with full reference together with IUPAC copyright symbol (© 1990 IUPAC), is printed. Publication of a translation into another language is subject to the additional condition of prior approval from the relevant IUPAC National Adhering Organization.

Information on training in radiochemistry and nuclear techniques

INTRODUCTION

In recent years the scientific community has been alarmed by reports of a decline in training in nuclear and radiochemistry (NRC), substantiated by a reduction in the number of relevant chairs at universities. At the same time, there have been indications of a shortage of trained nuclear and radiochemists in countries with advanced nuclear energy programs. This situation nonetheless reflects the multifarious applications of radionuclides and radiochemical techniques to life sciences, radiopharmacy, environmental studies, etc. A decrease in opportunities of training in basic NRC may in turn affect its general future.

In an attempt to obtain a clearer picture of the situation, the Commission on Radiochemistry and Nuclear Techniques has conducted a world-wide inquiry on training in the field of NRC. For this purpose a questionnaire was sent to correspondents in about 80 countries.

In order to facilitate the compilation, it was requested that information be presented under three headings: (i) training information at universities and other institutions; (ii) contact for other activities; (iii) technical information.

The final report covers 59 countries. A few countries active in the field could not be included because there was no response to the questionnaire in spite of reminders.

DATA COMPILATION

The information provided by the correspondents was very disparate, both in the amount of material (from a few lines to ten or more pages) and in the quality of data. The data have been rationalized according to the scheme indicated above. In general, the information given by the correspondents was included in its entirety without further selection. The 59 countries are listed in alphabetical order. Several comments should be made:

- Training information : For many countries the distinction between undergraduate - graduate and postgraduate courses (in the Anglo-Saxon terminology) is not obvious. In many cases the distinction between special courses on nuclear and radiochemistry and the introduction of these topics in a normal curriculum is ambiguous. Institutions are listed in which no formal training is offered, but where research in the field is being carried out, albeit research topics have generally been omitted. In a few instances the detailed program of the courses has also been left out since most courses have approximately the same classical content. When available, the names of persons responsible for courses have been included.

- Contacts for other activities and technical information have been reproduced in the manner indicated by the authors. The information gathered for these rubrics is very disparate and, in some instances, has been included under one or more of the above headings.

Several training courses organized on a regular schedule are mentioned. However, specific courses and organization of conferences, symposia, etc. are reported in the IAEA publication "Meetings on Atomic Energy", a quarterly world-wide list of all related manifestations, including nuclear chemistry and radiochemistry.

CONCLUSION

With minor exceptions, training in NRC is given in all recorded countries at some level. Emphasis is placed on the handling of radioisotopes, on health physics, applications to life sciences and on environmental studies. A large part of the training programs is oriented towards nuclear medicine and radioanalytical techniques. Education in NRC is a general concern and that the necessity of providing scientists specialized in the field is well understood. Further information on the situation in specific countries may be obtained from the corresponding references indicated in the compilation.

Technical information

Seminars organized by the Chemical Society of DDR, Fachverband Analytik, AG Radiochemie
Regular Symposia and Conferences

Application of Isotopes and Radiation in Industry (symposium), every three years, Leipzig
Isotopes in Nature (symposium), every three years, Leipzig

Interaction of Radiation with Matter (symposium), every three years, Leipzig

All three are organized by Zentralinstitut für Isotopen und Strahlenforschung, Leipzig
(one every year)

Nuclear Methods of Analysis (Conference) ; every three years, Dresden - organized by
Zentralinstitut für Kernforschung

Coming events : - International Seminar on Nuclear Analytical Techniques (1991, Dresden)
- Applications of Neutron Generators (1989, Dresden)

Annual reports of Zentralinstitut für Kernforschung (ZfK) (in three parts : research on nuclear
fuel, radioactive isotopes, nuclear and solid state)

Annual report of Zentralinstitut für Isotopen und Strahlenforschung (ZfI)

Journals : "Isotopenpraxis" ; "Kernenergie".

Training

At degree and postgraduate level there are no formal courses recognized by the Council of National Academic Awards. Radiochemistry is covered to a greater or lesser extent in a number of first degree courses and in some of the postgraduate courses. University groups presently interested in some aspects of radiochemistry and nuclear chemistry are listed below

Scottish Universities Reactor Centre
 East Kilbride
 Glasgow G 750 QU

provide lecture courses
 from time to time on demand

Dr. M. Streat
 Dr. L.V.C. Rees
 Dr. D.S. Cronan

The Imperial College Reactor Centre
 Silwood Park
 Ascot, Berks. SL5 7PX

same

University of Manchester
 Manchester

radiochemical research ;
 only place with interest
 in nuclear chemistry

Dr. G.W.A. Newton
 Dr. V.J. Robinson

University of Salford
 Salford

research in radiochemistry
 and radiation chemistry

Dr. R. Blackburn
 Dr. P.J. Baugh

University of Wales
 Institute of Science and Technology
 King Edward VII Av.
 Cardiff, CF1 3NU

research on radioactive waste
 disposal

Dr. D.R. Williams
 Dr. G.L. Christie
 Dr. J.E. Cross

Outside the universities

Department of the Environment
 Building Research Establishment
 Garston, Watford, WD2. 7JR

waste disposal studies

The Natural Environment Research Council waste disposal studies
 British Geological Survey
 Keyworth, Nottingham, NG12. 5GG

The Natural Environment Research Council
 The Institute of Terrestrial Ecology environmental activities
 Merlewood Research Station
 Grange Over Sands, Cumbria LA11. 6JU

Direktorate of Fisheries Research
 Fisheries Research Laboratory radioactivity in fish
 Lowestoft, Suffolk, NR 33. OHT

National Radiological Protection Board Laboratory radiochemical studies
 Chilton, Didcot, OX11. ORQ

Training

Nuclear and radiochemistry courses are offered at 42 PhD granting institutions and at 75 non PhD granting institutions. The excerpt which follows is taken from the document "graduate studies in nuclear chemistry, radiochemistry and related disciplines" prepared by the "Committee on Training of Nuclear and Radiochemistry" of the Division of Nuclear Chemistry and Technology of the American Chemical Society.

University of Arkansas
 Department of Chemistry
 Fayetteville, Arkansas 72701

graduate studies in nuclear
 and radiochemistry leading Prof. P.K. Kuroda
 to MS and PhD

California State University
 Department of Chemistry
 Northridge, CA 91330

graduate studies in David Miller
 radiochemistry

University of California Department of Chemistry 419 Latimer Hall Berkeley CA 94720	graduate studies in nuclear chemistry	Prof. Darleane C. Hoffmann
University of California Department of Chemistry Irvine CA 92717	graduate studies in radiochemistry and nuclear chemistry leading to the MS and PhD	Prof. Vincent P. Guinn
University of California Department of Radiological Sciences Biomedical Physics Division Los Angeles CA 90024	graduate program in Biophysics including courses in radiochemistry, radiopharmaceutical chemistry and radio-nuclide production	Jorge R. Barrio
University of California Department of Chemistry B; 601 La Jollas CA 92093	graduate studies in cosmo-chemistry including nuclear chemistry	Contact : Chemistry Student Affair Office
Carnegie-Mellon University Department of Chemistry 4400 Fifth Avenue Pittsburgh, PA 15213	graduate training in nuclear chemistry	Prof. Morton Kaplan
Clark University Chemistry Department Worcester, MA 01610	graduate studies leading to MA and PhD in nuclear chemistry	Prof. Daeg S. Brenner
Drexel University Department of Chemistry Philadelphia, PA 19104	research program in nuclear and radiochemistry integrated in the chemical curriculum	Prof. Jack G. Kay
Eastern Michigan University Department of Chemistry Ypsilanti, MI 48197	courses in radioisotope techniques nuclear analytical techniques and nuclear chemistry	Prof. K. Rengan
The Florida State University Department of Chemistry Tallahassee, Florida 32306	MS and PhD in nuclear and radiochemistry	Dr. Raymond K. Sheline Dr. Gregory R. Choppin Dr. Ronald J. Clark
Georgia Institute of Technology School of Chemistry Atlanta, Georgia 30332	graduate studies in nuclear and radiochemistry leading to MS and PhD	Prof. Richard W. Fink
University of Illinois Institute for Environmental Studies 1005 W. Western Avenue Urbana, Ill.	nuclear studies within nuclear engineering and environmental science programs	Prof. Philip K. Hopke
Indiana University Department of Chemistry Bloomington, IN 47405	MS and PhD in chemistry, intensive research in nuclear chemistry	Prof. Vic. Viola
Iowa State University Department of Physics Ames, Iowa 50011	graduate studies in nuclear physics leading to MS and PhD	Prof. John C. Hill Prof. Fred K. Wohn
The John Hopkins University Department of Environmental Health Sciences Division of Radiation Health Sciences 615 N. Wolfe Street Baltimore, Maryland 21205-2179	courses and research in radiochemistry leading to ScM, ScD or PhD	Dr. John R. Lever
University of Kentucky Department of Chemistry Lexington, KY 40506-0055	graduate studies in radiochemistry and nuclear chemistry leading to Ms and PhD	Prof. William D. Ehmann Prof. Robert T. Sullins Prof. Steven W. Yates

University of Maryland Department of Chemistry College Park, MD 20742	broad program in nuclear and environmental chemistry	Prof. William B. Walters
University of Michigan Hospital Division of Nuclear Medicine Box 021 1405 E Ann st. Ann Arbor, Michigan 48109	postgraduate training in nuclear medicine	Dr. Donald Willand Dr. Leslie Rogers Dr. Richard Ehrenkaufer Dr. Richard Hichwa Dr. W. Leslie Rogers

University of Missouri Department of Chemistry Columbia, MO 65211	graduate studies in radiochemistry leading to MS and PhD	Prof. David E. Troutner
University of Missouri-Rolla Department of Chemistry Rolla MO 65401	same	
The Pennsylvania State University Department of Nuclear Engineering Penn State Breazeale Reactor University Park, PA 16802	same	Dr. Gary L. Catchen
Purdue University Department of Chemistry W. Lafayette IN 47907	same	Dr. H.L. Pardue
Rensselaer Polytechnic Institute Department of Chemistry Troy NY 12180	same	Dr. David A. Aikens
University of Rochester Department of Chemistry Rochester, NY 14627	same	Prof. J.R. Huizenga Prof. W.V. Schröder
Rutgers University Department of Chemistry Piscatway, New Jersey 08854	same	Prof. R.H. Herber
San Jose State University Department of Chemistry San Jose CA 95192	- MS in radiological health physics - MS in chemistry	Dr. R.P. Yaffe
State University of New York at Stony Brook Strong Brook NY 11794-3400	graduate studies in nuclear chemistry leading to MS and PhD	Prof. John Alexander
University of Tennessee Department of Chemistry Knoxville, TN 37996-1600	graduate studies for research on transuranium elements	Prof. Joseph R. Peterson
Texas A and M University Department of Chemistry College Station, TX 77843	graduate studies in nuclear chemistry and radiochemistry leading to MS and PhD	Prof. E.E. Hazen
Washington State University Department of Chemistry and Nuclear Radiation Center Pullman WA 99 164-1300	same	Prof. R.H. Filby
Washington University Department of Chemistry St Louis MO 63130	same	Prof. Lee G. Sobotka
University of Washington Chemistry Department BG 10 Seattle WA 98195	same	Dr. Robert Vandenbosch

Summer school

The American Chemical Society Division of Nuclear and Radiochemistry runs since a few years a summer school in Nuclear Chemistry at San Jose State University for undergraduate students. For Inquiry : Dr. Trish Baisden, Nuclear Chemistry Division, Lawrence Livermore National Laboratory, PO Box 808, Livermore CA 94550. A second summer school is foreseen in 1989 at Brookhaven National Laboratory.

Contact

Division of Nuclear and Radiochemistry of the American Society

Chairman : Prof. J.M. Alexander, State University of New York at Stony Brook, Department of Chemistry, Stony Brook NY 11794

for information on workshops, symposia and other activities in the field

Committee on Nuclear and Radiochemistry of the National Research Council, National Academy of Science

Chairman : Prof. Edward C. Macias, National Research Council, 2101 Constitution Avenue, Washington DC, 20418

for information on workshops, symposia and other activities in the field.

Technical information

Gordon Research Conferences on Nuclear Chemistry : Information given annually in Science magazine

Monograph Series on Radiochemistry, Radiochemical Techniques and Nuclear Medicine published by the Committee on Nuclear and Radiochemistry, National Academy of Science

Available at Technical Information Center, Office of Scientific and Technical Information, United States Department of Energy, Washington.

Progress and annual reports of many of the listed institutions are available

Monograph on "Graduate Studies in Nuclear Chemistry, Radiochemistry and Related Disciplines" prepared by the Committee on Training of Nuclear and Radiochemistry of the Division of Nuclear Chemistry and Technology of the American Chemical Society.

The document gives details on courses and research programmes performed in the listed universities

"Nuclear Chemistry Education in US Universities and colleges" by E.C. Macias and G. Friedlander, review presented at the US National Research Council/National Academy of Science Workshop on "Training Requirements for chemists in Nuclear Medicine, Nuclear Industry and Related Areas", Washington DC, 1988.

Available from Prof. Edward S. Macias, Washington University, Chemistry Department, Saint Louis, MO.

Training

University of Belgrade
Faculty of Natural Sciences
and Mathematics
Studentski trg 16
Belgrade

graduate and postgraduate levels : radiochemistry,
nuclear chemistry, physical bases of nuclear
chemistry, applied radiochemistry

University of Sarajevo
Faculty of Natural Sciences and
Mathematics
Vojvode Putnika 43a
Sarajevo

graduate and postgraduate levels : radiochemistry,
chemical analysis (Master degree), radiochemical
methods, radioisotopes in biochemical research

University of Ljubljana
Faculty of Natural Sciences and
Technology
Askerceva cesta 9a
Ljubljana

postgraduate level : radiochemical analysis (Master
degree)

University of Zagreb
Center for Postgraduate Studies
Trg Marsala Tita 14
Zagreb

Master degree in physical chemistry and
radiochemistry : nuclear chemistry and
radiochemistry, chemical effects of nuclear
transformations and radiation chemistry, handling
techniques of radionuclides
Master degree in analytical chemistry : radiochemical
methods
Master degree in medical biochemistry : radiochemical
methods

Boris Kidric Institute of Nuclear Sciences
Center for Permanent Education
Kosancicev venac 29
11000 Belgrade

courses at all levels in radioactivity and application of radioisotopes
special training courses for medical doctors and other users of radioisotopes
